

Construction drawings for the Fluff forms:

Each of the two $\frac{3}{4}$ " tubes can be made from two 10' conduits and a 36" conduit. The conduits will be spaced about 4" apart. We may need spacer supports

We will need approximately 28 2x2x15" pieces for the form support on a 4x8 sheet for the base.

We may need a 40x20 sheet

Or we can use 2x4x15" pieces for the inner forms. We probably have enough scrap 4x4s for this.

It will take 7 or 8 bends to make the sides. The Halloween tubing required 2 bends.
