

Conductor's report for 11/15/13

This group ride went very smoothly today. There are no anomalies to report.

I believe, however, that we did have a unique experience on the railway today. We had a total of 99 passenger on the run from Bonsal to New Hill. On the return trip we had a total of 101 passengers!
A family arrived after we departed Bonsal. Dave Chasco and Brian arrange to have them meet the train at New Hill. They boarded the train and made the return trip to Bosal.
